Complaint Description

Please describe the issue(s) you want to disclose, including the alleged violator(s), the alleged wrongdoing, the location(s) and date(s) of the alleged wrongdoing.

I am being held in a 'digital' 'catch and kill' false imprisonment by Donald Trump. I am being spied upon and followed both digitally and in-person by people that are receiving information about my whereabouts and movements in real time. A spy program has been placed in my computers and telephones to monitor my communications and everything that I am working on in real time. There has also been evidenced to me an ability to 'watch' me inside of my home using some form of FLIR (infrared camera) or OLED (organic light emitting diode) nanotechnology. Furthermore, this information is being transferred to others and people are 'meeting me' at every location that I go to - even here in Spain - to evidence that I have 'no way' of avoiding this problem.

Around 2020-2021, while I was working to investigate the voting results of the 2020 presidential election, Donald Trump began to impose himself over our home using advanced level technology. Since then, the problem has grown progressively worse and includes threats, harassment, and crimes against me. I have gone as far as reporting this to the local police in San Antonio, Texas; to the local police in Periana, Spain; to the FBI, to the Secret Service, and to the House Oversight Committee. I am preparing a civil lawsuit to present my case in federal court.

Have you filed your concerns elsewhere or contacted another government office about this allegation?

Yes.

If yes, where else have you filed, and/or which government offices have you communicated with about this allegation, and what is the status of any related investigation(s)?

San Antonio Police Department, United States Secret Service complaints of Employee Misconduct, Federal Bureau of Investigation, and Periana Local Police in Spain.

Do you have any colleagues that can support your concerns and are willing to communicate with our office?

My wife has been subjected to this intrusion and also sees and understands the nature of the problem.

Do you believe you have experienced or been threatened with retaliation in connection with your concerns?

Yes.

If yes, please describe any retaliation you have experienced or been threatened with in connection with your concern(s)

I have home security footage of a man with a gun approaching me in my front yard on August 08, 2024 and firing that weapon near my feet. I immediately reported this crime to the San Antonio Police Department.

SUPPLEMENTARY EMAIL OF 06/13/2025:

https://science.house.gov/email-us

I am writing this email in supplement to my previous 'Whistleblower Report' of June 12, 2025. I am writing to inform this committee that it is being evidenced to me inside of my home that a criminal element that has access to the United States government is using satellite internet services to maintain nano-tech 'bugs' and surveillance equipment inside of our home. I will write a formal letter to better describe this matter to you soon. Thank you.
